MUSIC
Shankar Barua (India)
György Jellinek Gaál (Hungary)

ALAGUT / Budapest , Hungary

Exhibition organized by Tibor Kovacs-Egri

"Webism - art connecting the world" - with this title will be held an international virtual exhibition of fine art on 19 June in the Tunnel (Alagút). Webism is an international movement of art, his members are professional artists adapting, by creating their pictures, also the possibilities offered through the computer besides the traditional methods. However the computer technology has eliminated, not only the limits of the process of creating, but also the limitations of the communication between creators and spectators.

The visitors have the possibility to view together 300 artworks of 22 artists from 10 countries on six(6) plasma televisions.
